WORK EXPERIENCE

Software Engineer

Firefly Integration | September 2019 - Present

Started creating configuration files for new RV systems to connect and sync with the Mira & Eclipse mobile apps. Transitioned to designing and implementing functionality in the apps to function with different systems including but not limited to HVAC, lighting, and awnings. Responsible for general debugging, maintenance, cross-team collaboration, Android app releases, and hot fixes. Developed using Cordova, Angular, and SASS.

Web Developer

IUPUI Living Lab | January 2019 - May 2019

Built the Avon Christian Community WordPress website. Responsible for debugging, quality control, reliability, layout, site functionality, and documentation. Developed the new IUPUI Living Lab WordPress website. Responsible for layout, design, debugging, and functionality. Developed using Agile development, WordPress, JavaScript, HTML, and CSS.
